

Firefox Configuration:

- ☐ **Import firefox settings:**

- ☐ [First, download both files from this folder:](#)

- ☐ Next, go to the firefox preferences located at:

C:\Program Files\Mozilla Firefox\defaults\pref

- ☐ Paste the file “local-settings.js” into this folder

- ☐ Then go to the firefox installation directory:

C:\Program Files\Mozilla Firefox\

- ☐ Paste the other file, “mozilla.cfg”

- ☐ Restart firefox, then ensure it says “Some settings managed by your domain”

- ☐ For the settings that you’re still able to set, set them
